

## HP and IDIT Software Suite

From IDIT I.D.I. Technologies LTD.

The ultimate solution for all insurers wanting to adopt proven modern technologies.

### Global core insurance platform

Expanding into new markets has significant IT implications for carriers as they need to understand the regulatory and cultural implications associated with insurance products. IDIT Software Suite is geared to address the demand for global core insurance platforms worldwide.

### IDIT - an enterprise insurance software solution

IDIT Software Suite is an end-to-end enterprise insurance software platform which integrates the business capabilities essential for any insurance provider. IDIT is service oriented architecture (SOA) based integrated solution, that manages all personal and commercial insurance products, for traditional insurance, direct insurance, banc assurance and brokers markets. IDIT is component-based, with core, country and customer layers. IDIT is a global software suite, with international standards for multi-company, multi-branding, multi-currency and multi-lingual capabilities. IDIT allows global carriers to create new insurance products as well as versions of existing products to meet the needs of new markets.

### Solution benefits:

- Supports all general insurance—personal and commercial—lines of business
- Integrates all front office and back office processes
- Uses an N-Tier distributed system, built using object oriented technology
- Utilizes cross-platform and cross-database for full integration with existing environments
- Fully SOA compliant solution on the JAVA/J2EE platform

### Working together with HP

Increased regulatory and compliance requirements, changing risk landscapes, and competition in the insurance industry are increasing the pressure on insurance companies to deliver stronger financial results while balancing growth with cost efficiencies. Improving bottom-line profitability and profitability per customer are key issues for insurance companies. HP is a leading provider of business technology products, services and solutions for the insurance industry. The broader portfolio enables us to deal with the business outcomes that matter most to CIOs:

- Providing reliable information to enable better business decisions
- Lowering risk to the enterprise with better control of the infrastructure
- Reducing the cost of IT while delivering more to the business

HP understands what customers need and we can provide the international stature and rich portfolio of solutions to set the industry agenda. And we have the technology and partnerships to deliver.

## IDIT scalability on HP-UX

IDIT Software Suite sets new records on number of online users and active policies. In a benchmark test with HP-UX at HP labs in Boblingen Germany, IDIT Software Suite was fully capable of handling high load scenarios of over 3200 concurrent online users and a database of over 26 million active policies and insurance contacts. The benchmark test confirms that IDIT Software Suite is one of the most powerful and robust general insurance (property and casualty) applications in the world, suitable for Tier-I and global insurance companies.

The results indicated that the system is fully scalable, in a nearly linear way, over the platform used:

- Sub-second response time for up to 99 percent of the requests under high activity load
- High thread count and very good completion times for large batch processes
- Web service response time of fewer than 500 milliseconds under load

### HP products supported

Our solutions are supported on a broad range of HP servers across both RISC and/or Intel architectures. From blades and clustered servers to high-powered, 64-bit, multi-processor supercomputers, HP servers set the standard for performance, scalability, availability and manageability. With industry-leading innovation and value, HP servers are the ideal choice for helping you meet today's business challenges while preparing for tomorrow's.

### Operating systems supported

Our solutions are optimized for the HP-UX 11i platform—a powerful and agile operating environment that delivers mature UNIX capabilities with the highest levels of quality. This business-critical platform provides virtualization capabilities that automatically allocate system resources to meet fluctuating business demands. In addition, HP-UX 11i includes built-in intelligent management to provide greater insight into and better control of your end-to-end computing environment. With broad support of industry standards, the HP-UX 11i operating system protects your long-term investment while unlocking the full value of IT assets, lowering operating costs, and reducing system complexity.

### Service and support

From the early engagements with the customer, through implementation and during the support and maintenance phases of a project, IDIT distinguishes itself as a true partner by supporting the IDIT Software Suite with one of the best and most professional general insurance system integration and consultancy services.

### Building on the value of strong relationships

By working collaboratively with HP, we can leverage the necessary resources, experience and knowledge to deliver tailor-made solutions that drive better business value. For more than 50 years, HP has thrived on innovation, holding a proven track record of success in virtually every market, customer segment and region worldwide. Together, we use innovative technology and services to design solutions that meet today's business challenges, while helping you prepare for tomorrow's.

HP and IDIT I.D.I. Technologies are continuously collaborating on marketing, sales and technical topics across the insurance marketplace worldwide. The complementary domain expertise of HP and IDIT enhances the quality and functionality of solutions delivered to the end customers.

### Working together to drive success

By combining standards-based and modular technologies with our leading-edge applications and comprehensive services portfolio, you gain a powerful, flexible solution that meets your business needs today and dynamically adapts as those needs change. We provide an agile foundation for building a highly responsive enterprise that drives better business outcomes and promotes your long-term success.
